

GIVE YOUR PREMIE THE BEST CHANCE TO  
**Grow Strong**

## Your Breast Milk Is Best

In preterm infants, breast milk is associated with<sup>1</sup>

- reduced infectious and inflammatory disease
- enhanced neurodevelopmental outcomes
- healthy early postnatal growth patterns

### Did you know?

*There may be factors in cow milk products that negatively affect the premature intestine<sup>2</sup>*

## Prolact+ H<sup>2</sup>MF<sup>®</sup> Is The Only Human Milk Fortifier Made From Breast Milk

Provides the additional calories, protein, and nutrients needed by babies weighing  $\leq 1250$  g at birth

Helps meet American Academy of Pediatrics' recommendation for the use of breast milk in preterm infants by boosting nutritional content of breast milk to meet the added nutritional needs of the premature infant<sup>1</sup>

### Did you know?

*All other fortifiers are made from cow milk*

### Talk to your baby's doctor about Prolact+ H<sup>2</sup>MF<sup>®</sup>

Fortifying breast milk with Prolact+ H<sup>2</sup>MF<sup>®</sup> is the only way your premature baby can benefit from a 100% human milk-based diet at this critical time in their life.

To review the clinical trial data for Prolact+ H<sup>2</sup>MF<sup>®</sup> supporting its use in NICU premies, please visit [www.Prolacta.com/Publications](http://www.Prolacta.com/Publications).
