REFERENCES for Presentation “Are Early Enteral Feedings and Standard Feeding Protocols Right for Your NICU?”

Influence of Enteral Nutrition on Occurrences of Necrotizing Enterocolitis in Very Low Birth Weight Infants.
Santos Kimak K, de Castro Antunes MM, Braga TD, Figueira F, Brandt KG, de Carvalho Lima M.

Prevention of postnatal growth restriction by the implementation of an evidence-based premature infant feeding bundle.
Graziano PD, Tauber KA, Cummings J, Graffunder E, Horgan MJ.

Impact of Process Optimization and Quality Improvement Measures on Neonatal Feeding Outcomes at an All-Referral Neonatal Intensive Care Unit.
Jadcherla SR, Dail J, Malkar MB, McClead R, Kelleher K, Nelin L.

Use of a Feeding Bundle Appears to Reduce Central Line Utilization in Neonates.
Tauber KA, Graziano P, Graffunder E, Horgan M.

Delayed introduction of progressive enteral feeds to prevent necrotising enterocolitis in very low birth weight infants.
Morgan J, Young L, McGuire W.

Standardized Slow Enteral Feeding Protocol and the Incidence of Necrotizing Enterocolitis in Extremely Low Birth Weight Infants.
Viswanathan S, McNelis K, Super D, Einstadter D, Groh-Wargo S, Collin M.

Human milk and neurodevelopment in children with very low birth weight: a systematic review.
Koo W, Tank S, Martin S, Shi R.
Improving preterm infant outcomes: implementing an evidence-based oral feeding advancement protocol in the neonatal intensive care unit.
Kish MZ.

Feeding preterm neonates with patent ductus arteriosus (PDA): intestinal blood flow characteristics and clinical outcomes.
Havranek T, Rahimi M, Hall H, Armbrecht E.

Early trophic feeding versus enteral fasting for very preterm or very low birth weight infants.
Morgan J, Bombell S, McGuire W.

Preventing necrotizing enterocolitis with standardized feeding protocols: not only possible, but imperative.
Gephart SM, Hanson CK.

A.S.P.E.N. clinical guidelines: nutrition support of neonatal patients at risk for necrotizing enterocolitis.
Fallon EM, Nehra D, Potemkin AK, Gura KM, Simpser E, Compher C; American Society for Parenteral and Enteral Nutrition (A.S.P.E.N.) Board of Directors, Puder M.

Safety of initiating early enteral feeding with slow volume advancement in preterm infants.
Jirapaet K, Jirapaet V, Sritipsukho S.

Prevention and treatment of necrotising enterocolitis in preterm neonates.
Patole S.
Early Hum Dev. 2007 Oct;83(10):635-42.

Enteral feeding regimens and necrotising enterocolitis in preterm infants: a multicentre case-control study.
Henderson G, Craig S, Brocklehurst P, McGuire W.

Standardised feeding regimens: hope for reducing the risk of necrotising enterocolitis.
Premji SS.

Impact of standardised feeding regimens on incidence of neonatal necrotising enterocolitis: a systematic review and meta-analysis of observational studies.
Patole SK, de Klerk N.
Prolonging small feeding volumes early in life decreases the incidence of necrotizing enterocolitis in very low birth weight infants.
Berseth CL, Bisquera JA, Paje VU.

Benefits of a standardised feeding regimen during a clinical trial in preterm neonates.
Patole SK, Kadala Rajas, Tuladhar R, Almonte R, Muller R, Whitehall JS.

The incidence of necrotizing enterocolitis after introducing standardized feeding schedules for infants between 1250 and 2500 grams and less than 35 weeks of gestation.
Kamitsuka MD, Horton MK, Williams MA.

Improved outcomes with a standardized feeding protocol for very low birth weight infants.

The pathophysiology of prolonged periods of no enteral nutrition or nothing by mouth.
Strodtbeck F.
Newborn and Infant Nursing Reviews 3(2); 47-52, 2003.

Early enteral feeding in very low birth weight infants.
Hamilton E, Massey C, Ross J, Taylor S.

Tolerance to early human milk feeding is not compromised by indomethacin in preterm infants with persistent ductus arteriosus.
Bellander M, Ley D, Polberger S, Hellström-Westas L.

Enteral feeding during indomethacin and ibuprofen treatment of a patent ductus arteriosus.

Late Enteral Feedings Are Associated with Intestinal Inflammation and Adverse Neonatal Outcomes.
Konnikova Y, Zaman MM, Makda M, D’Onofrio D, Freedman SD, Martin CR.

Avoiding postnatal undernutrition of VLBW infants during neonatal intensive care: evidence and personal view in the absence of evidence.
Maas C, Poets CF, Franz AR.
Slow advancement of enteral feed volumes to prevent necrotising enterocolitis in very low birth weight infants.
Morgan J, Young L, McGuire W.

Malhotra Y, Nzegwu N, Harrington J, Ehrenkranz RA, Hafler JP.
