Now with 48-HOUR expiration* and SIMPLIFIED PREPARATION INSTRUCTIONS. Easy to use. Less waste. No more complicated measuring.

Prolact CR® human milk caloric fortifier is the only completely human solution created to add calories to mother’s own milk or donor milk without substantially increasing volume and without introducing a non-human milk-based nutritional product. Ideal for neonatal infants receiving low caloric content, Prolact CR fortifier is formulated to increase lipids and achieve adequate growth.

*In-use expiration, once the thawing process begins.
